  5. Provide 1 (one) return stud service of the same dog to the same bitch if no pregnancy results from the mating, at no charge, the next heat cycle. To receive the return service, the bitch owner must notify the stud dog owner of failure to conceive, in writing, no more than 65 days following the first mating. **BITCH OWNER AGREES TO:**

1. Provide a 4 generation pedigree before servicing (if not before servicing, then before pups are born).
2. Keep the bitch properly confined following the breeding to ensure no other dog could mate her accidentally before mating season is finished.
  - a. If the bitch does accidentally mate or is in the presence of another intact male, bitch's owner agrees to DNA test the entire litter as well as the Dam to determine the correct parentage. Failure to do so will result in no litter registration being signed and no refunds being given.
  - b. If DNA test is needed, it must be done by AKC's (American Kennel Club) DNA program. If another company is needed, then the dam's owner agrees to pay for any DNA or accumulated cost associated with this issue for the sire's owner. Failure to do so means no registration application will be approved.
  - c. If it turns out in the future that the dam's owner wasn't aware another male got to the dam. The dam's owner agrees to take all responsibility for the mistake and to pay for any fees to correct the mistake.
3. Agrees to not knowingly sell or transfer puppies whelped as a result of this mating to any person or firm connected with the business of resale or wholesale of dogs (Puppy Mills, Labs, Pet Stores, etc). If Bitch's owner knowingly sells to a puppy mill, lab, or pet store, then Bitch's owner agrees to pay \$5000 for breach of contract to stud owner. - Please note, sire's definition of a puppy mill is a breeder who has over 30 dogs and most, if not all, is housed in cages.
4. If return stud service is required and stud owner does not have the stud anymore, Dam owner understands the stud owner has the right to use a different stud with some similarities of the original stud including and limited to being within 48 ounces of the original stud's weight, having the same type of registration, and having a nice temperament. If the dam owner declines to use the new studs available, then they forfeit the return studing.
